10 Year Anniversary Celebration

Anticoagulation Consultant Pharmacists

Satinder Bhandal
Buckinghamshire Health Care NHS Trust
High INR email alerts reduced rate of high INRs & warfarin prescribing app in inpatients

Improved transfer of care of patients discharged on warfarin

Supporting education at different levels local, regional, UKCPA and CPPE

Involvement in pan-London AF group, working to reduce stroke secondary to AF through better anticoagulation treatment pathways
Katherine Stirling – Leeds Teaching Hospitals NHS Trust

VTE Prevention – >95% of adult patients are risk assessed
☑ Working with teams across the Trust to achieve this CQUIN
☑ 50% reduction from 13/14 to 14/15 in HAT
☑ Route cause analysis, and sharing learning
• Controversy on how best to dose pregnant women for the management of VTE
  • 1.5mg/kg once daily OR 1mg/kg twice a day
• How adherent are women to LMWH?
Satinder Bhandal – Buckinghamshire Healthcare Trust

✓ Achieved 95% VTE risk assessment target for first time & now pharmacy lead for VTE
✓ Pharmacist led county wide NOAC service
✓ 2,500 patients reviewed annually
✓ Extending to run satellite clinics in primary care
✓ Replicating model to other long term conditions
✓ Davenport research award
The Future of Consultant Pharmacists

Dr Keith Ridge CBE
Chief Pharmaceutical Officer
Supporting NHS England, Department of Health and Health Education England

Royal Pharmaceutical Society
16th June, 2015
Consultant Pharmacists: What was hoped for?

“The highest level of clinical practice, “give back” through participation in education and training and through practice research that moved patient care forward. Succession planning was key and of course professional and clinical leadership”

John Farrell, 2015
The Forward View identifies three ‘gaps’ that must be addressed:

<table>
<thead>
<tr>
<th>Gap</th>
<th>Description</th>
</tr>
</thead>
</table>
| **Health & wellbeing gap** | • Back national action on major health risks  
• Targeted prevention initiatives e.g. diabetes  
• Much greater patient control  
• Harnessing the ‘renewable energy’ of communities |
| **Care & quality gap** | • Neither ‘one size fits all’, nor ‘thousand flowers’  
• A menu of care models for local areas to consider  
• Investment and flexibilities to support implementation of new care models |
| **Funding gap**     | • Implementation of these care models and other actions could deliver significant efficiency gains  
• However, there remains an additional funding requirement for the next government  
• And the need for upfront, pump-priming investment |
Review of Operational Productivity in NHS Providers

• Workforce, Estates, Procurement, Hospital Pharmacy and Medicines Optimisation (HoPMoP)
• Tackling unwarranted variation
• Single metric: Adjusted Treatment Index
• £5Bn savings by 2019/20
Principles of Medicines Optimisation

Medicines Optimisation:
Helping patients to make the most of medicines

Good practice guidance for healthcare professionals in England

May 2013
