Learning Outcomes

- To gain a better understanding of patient centred pharmacy support
- To learn about ways to help people with visual impairment get more from their medicines
- To learn about ways to help people with cognitive impairment get more from their medicines
- To identify areas for improvement of your current service provision and start to develop an action plan to address deficits.
- To share good practice and network with peers to develop your knowledge base.

Target Audience

- NHS patient facing pharmacy staff working with older people in any pharmacy setting
- CCG Pharmacists commissioning patient facing services
- Senior Academic pharmacists training pharmacists for the future.
